Is There a Realistic Chance of a 17th US President Elected by the Electoral College? In the US Presidential Election of 1824, three candidates garnered 45 electoral votes: Andrew Jackson, John Quincy Adams, and William H. Crawford. John C. Calhoun, who ran a spoiler campaign, received the final 6 electoral votes. The situation is looking similar in this year's Presidential Election. A familiar face in two of the three major party candidates could be disastrous for the Democratic Candidate, Hillary Clinton. The fact that no Vice Presidential nominee is a proven political leader gives some in-depth analysis to the US Electoral College. Arguably, the most common issue that surrounds the US Electoral College is that only around 50% of the US population can vote, limiting a large percentage of the American population from having any voice or opinion of the newly elected President. The Electoral College is designed to prevent a candidate who receives a majority of the popular vote from winning the Presidential Election. How it works: To begin with, the candidate who receives the most Electoral Votes (247 in 2012) is declared the winner, and then the whole process is repeated all over again until one candidate is declared the winner with at least 270 Electoral Votes. In the 2012 Electoral College, Mitt Romney received 206 Electoral Votes, and John McCain received 150. As a General term, the US Presidential Election is traditionally decided by the Electoral College. However, the Electoral 1cdb3666d

Glycoside hydrolase family 2 family 18 subfamily A enzymes which are required for synthesis of galactofuranose-containing O-antigen polysaccharides of Salmonella enterica were biochemically characterized. The purified glycoside hydrolase from the recombinant bacterium, Escherichia coli JM109 carrying a plasmid carrying the corresponding cDNA, released galactofuranose from a variety of galactofuranose-containing oligosaccharides
