MSSQL Browser Lite is a lightweight database management utility for Microsoft SQL Server that enables you to perform tasks without the need for a complex interface. This software lets you browse and modify Microsoft SQL Server databases, or create new ones using a single click. The interface is simple and unobtrusive, and the entire operation is performed with a single mouse click. Advanced Pagedown Express Editing. Look and Feel When you open MSP to enter your text, the layout of the application is that of the Windows Editor. That is, there is no toolbar, and no tabs at the bottom that divide the text into columns, or add icons. You must use the keyboard to navigate to each position in the document, and every time you do that, the application will be opened in edit mode, adding a new set of buttons to the screen. To move down the page, you will use the Page Up key, and to move up, you will use the Page Down key. To move left or right, you will use the arrow keys. The application is pre-loaded with a file, and it will open it with a text editor interface, and you will have to use the keyboard keys to move around. There will be a button in the toolbar, too, but its use is optional. There are two buttons at the bottom of the screen. The left one will show you the current location in the document, and the other button will prompt you to start a new document. A toolbar will appear as you start typing a text, and you will have to use the arrow keys to navigate to different parts of the text. You may use the Page Up and Page Down buttons to move across the document, or use the Home key to bring you back to the beginning. There will be a title bar and a status bar at the top of the window with a text editor there. You can use the arrow keys to navigate to different parts of the text. To start a new document, click on the top button. You will then see the document file window. Then type the title of the document, which will appear at the top of the window, and click the button that will save the file for you. To close the application, click the Close button. MSP is the simplest, freest, and fastest Windows text editor available, and it allows you to create, and modify, documents of different formats (text files, HTML pages, word documents, etc.).
